

# Street Design & Your Neighborhood

**How does street design affect your neighborhood, your property values and your family's health?**

Attend a free workshop with national traffic-calming and safe-streets expert Dan Burden to learn how calm traffic, road "diets," intersection design, trails, trees and sidewalks affect neighborhoods and neighbors. Discover the impact of street design on property values, health, quality of life, access to schools, job creation, exercise, the ability to "age in place," social capital and transportation options. Join other West Orange residents in reviewing best practices from throughout the country and Florida, and in learning how communities can leverage streets and transportation investments to make their neighborhoods even better places. The workshop, "Street Design & Your Neighborhood" will be held at:

**6:30 to 7:30 p.m. on Tuesday, February 28th**

**Children's Lighthouse/People of Faith, Winter Garden**
